

**PUBLIC NOTICE-CUSTOMERS OF
WARSAW PWS
FAILURE TO MEET MICROBIOLOGICAL MONITORING
REQUIREMENTS FOR DRINKING WATER**

Este informe contiene información muy importante sobre su agua potable. Tradúzcalo o hable con alguien que lo entienda bien.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During **February 2024**, we did not properly complete all monitoring or testing for total coliform bacteria, and therefore, cannot be sure of the quality of our drinking water during that time. This is a violation of Missouri Public Drinking Water Regulations.

Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did to correct the situation. Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or by distributing copies by hand or mail.

Provide explanation of cause of monitoring failure:

Samples were lost at Lab or in transport to Lab
Samples prior to February and after February came back good

For more information, please contact water system staff indicated below:

Mark Breshears at 660-723-3115 or 1255 Tanager Ln, Warsaw, MO
(name of water system contact) (phone number) (mailing address) 65355

Additionally, you may contact the department's Kansas City Regional Office at 816-251-0700 or Public Drinking Water Branch at 573-526-6925.
